

TraceSecurity Compliance Manager Implementation Program

www.tracesecurity.com

Solution Overview

TraceSecurity's Implementation Program is designed to help your organization gain complete access to all the benefits of TraceSecurity Compliance Manager as quickly as possible. Our integration specialists will set up and configure all relevant TSCM products, as well as train you and your staff on how to maximize your investment by effectively utilizing the products.

Training

- 4 Hours Web-based Training Session (Training is onsite if accompanied with another onsite TraceSecurity service)
- 2 hours Remote Online Training for Human Resources or other departments

User Setup Assistance

- Provide LDAP user integration or add up to 25 users manually
- Departmental and Management setup

TracePolicy Setup

- Upload up to 10 Customer Policies
- Assist in assigning policy approval
- Assign Policies to departments and/or individuals

TraceTrain Setup

- Assign up to 6 user training courses
- Assign to training departments and/or individuals
- Assist in scheduling ongoing training
