

vCISO

Virtual Chief Information Security Officer

A vCISO provides your organization with strategic guidance to help you reach governance, risk, and compliance objectives.

A vCISO can help with foundational components of your cybersecurity program, including but not limited to:

- Policy & Procedure Development
- Risk Management
- Cybersecurity Roadmaps
- Management & Board Presentations
- Regulatory Compliance Oversight
- Incident Response Management
- Security Awareness & Training

OUR EXPERTS

As an industry leader in security compliance and risk management solutions, TraceSecurity is proud to employ some of the industry's most qualified and knowledgeable security professionals

Our vCISO experts boast years of experience in cybersecurity and managed IT, as well as certifications in CISSP and CISM.
