Tabletop Testing Exercise

Guided emergency scenarios to test the effectiveness of your organization's response and recovery plans

Evaluate Your Plans & Procedures

TraceSecurity facilitates tabletop testing exercises to see how well your response and recovery plans hold up through a real incident. Our analysts walk your team through a simulated emergency, like a natural disaster or cybersecurity attack. After reviewing your plans and observing your performance of response and recovery activities, we provide expert recommendations on any missing action items and plan improvement.

Disaster Recovery

Focused on the recovery of lost infrastructure and data during an event

- Redundancies & Backups
- Data Recovery
- Restoring Operations
- Maintaining Systems

Incident Response

Focused on the identification and response actions during cybersecurity incidents
